

Control Box Options

We have a number of control options designed to match your specific application.

NEW from Airlift Doors

Waterproof, 2 button with relay. Featuring both pneumatic and electric emergency open functions. Internal relay provides increased safety.

Multi-door Control Box

Allows for individual door control from one central control box. Mounted in control room, away from environment and possible tampering.

Lite Selector Control Box

Lighted buttons show signal being received. In case of a constant up or down signal, the toggle switch will allow you to eliminate the safety eyes or the car wash to determine exactly where the signal is coming from

Other Control Options
